

PAIRS WELL WITH: LH 5965 VT2 PRO and LH 6317 VT2 PRO DG

POSITIONING & MANAGEMENT

Consistent with dependable high-yield potential over a wide geography and a wide range of soil types. It will perform best south of Highway 30 in Iowa and Nebraska. This hybrid works very well in gumbo soils near rivers and streams, especially under irrigation. It carries a semi-determinate ear, so best results will be at the higher end of the population range.

Highly Productive & Irrigated Fields	1
Moderately Productive/Average Fields	1
Less Productive/Stressed Fields	2

HYBRID ADVANTAGES

- Proven performance, east to west
- Moves south out of zone very well
- Handles river bottom gumbo soils
- Responds to higher populations and irrigation
